Comprehensive Pre-Surgical & Operational Follow-Up Tracker

Action Items, Specialist Inquiries, Lifestyle Milestones & Blank Dynamic Entry Grid

Status: Active Pre-Hab
Timeline: 12-Month Runway
Review Date: 7 November 2026

Purpose & Usage Instructions
Use this living tracker to manage specialist appointments, diagnostic milestones, pre-hab consistency, and marketplace operations (CVScan / Agensi). Blank fields and write-in tables are provided across pages for emerging clinical items.

1. Specialist & Clinical Care Follow-Up List

Direct consultations, diagnostic panels, and surgical planning checkpoints required across your care team:

Done	Specialist / Domain	Clinical Objective & Inquiries	Priority	Target Window
[ ]	Neurologist	Review SPS diagnosis timeline; discuss GABAergic management (baclofen / diazepam / IVIG protocols).	High	Month 1
[ ]	Anesthesiologist	Pre-admission anesthetic consultation: flag SPS, GAD antibodies, neuromuscular block sensitivity.	Urgent	Month 9-10
[ ]	Orthopedic (Knee)	Confirm surgical sequencing; evaluate meniscus/ligament repair vs arthroplasty timeline.	High	Month 2-3
[ ]	Orthopedic (Shoulder)	Review rotator cuff/labral imaging; discuss non-weight-bearing post-op sling requirements.	High	Month 3-4
[ ]	Orthopedic (Ankle)	Assess joint stability, hardware needs, and post-op weight-bearing restrictions.	High	Month 4-5
[ ]	Physical Therapist	Establish baseline isometric pre-hab without joint shear; obtain supportive braces/walking aids.	High	Month 1-2
[ ]	Pathology Lab	Baseline serum electrolytes (Na, K, Mg), 25-OH Vitamin D, full blood count, renal function.	Medium	Month 1
[ ]	Clinical Pharmacist	Conduct medication reconciliation for drug-supplement interactions and pre-op clearance.	Medium	Month 11

Table 1. Medical team consultations and pre-surgical milestones

2. Nutrition, Hydration & Supplement Protocol Implementation

Done	Protocol Item	Action Steps & Storage Verification	Priority	Target Window
[ ]	Bulk Salts Purchase	Procure unrefined grey/pink sea salt, Potassium Chloride (NoSalt), and Magnesium Malate.	High	Immediate
[ ]	Daily Hydration Prep	Establish 2L morning glass pitcher routine (1/2 tsp sea salt, 1/4 tsp KCl, fresh lemon).	High	Immediate
[ ]	Excitotoxin Purge	Eliminate MSG, yeast extracts, bouillons, aspartame, and aged/cured meats from kitchen.	High	Week 1
[ ]	Nut/Legume Substitutes	Stock pasture-raised eggs, fresh poultry/fish/beef, sweet potatoes, rice, and extra virgin olive oil.	High	Week 1
[ ]	Nightly Magnesium Stack	Start Magnesium Bisglycinate (350-400 mg) 45 min before sleep; monitor relaxation response.	High	Week 1
[ ]	Collagen Pre-Hab Dose	Take 15g collagen peptides + 500mg Vitamin C 45 minutes prior to isometric joint routines.	Medium	Month 2
[ ]	Pre-Op Supplement Stop	MANDATORY: Stop Omega-3 fish oil, Vitamin E, and high-dose herbal extracts 14 days pre-op.	Urgent	2 Wks Pre-Op

Table 2. Lifestyle, hydration, and nutritional execution checklist

3. Digital Projects & Publishing Follow-Up (CVScan & Agensi)

Action items to package, monetize, and deploy projects to creator platforms:

Done	Task / Workflow	Key Deliverables & URLs	Priority	Target Window
[ ]	CVScan Packaging	Verify SKILL.md frontmatter (name, description), test local prompts, and zip core codebase.	High	Current
[ ]	Agensi Dashboard Setup	Log in to agensi.io/dashboard; turn on Creator Mode in settings.	High	Current
[ ]	Payout Integration	Configure Stripe Connect or Zoneless USDC in Agensi dashboard for 70% revenue share.	High	Current
[ ]	Listing Submission	Upload CVScan ZIP package to agensi.io/sell; set pricing (one-time or subscription).	High	Current
[ ]	Storefront Branding	Review public profile at agensi.io/creators/your-handle; verify badges and description.	Medium	Post-Upload

Table 3. Digital operational tasks and creator platform milestones

4. Sensory De-Escalation & Home Pre-Hab Preparation

Done	Item	Environmental Adaptation	Priority	Target Window
[ ]	Acoustic Shielding	Acquire high-fidelity earplugs (Loop Engage) for sensory-dampened outings.	Medium	Month 1
[ ]	Bedroom Lighting	Convert bedroom bulbs to warm 2200K-2700K; install black-out blinds or obtain sleep mask.	Medium	Month 1
[ ]	Ergonomic Pillows	Procure knee/ankle spacer pillow and dedicated shoulder hug-pillow for joint off-loading.	High	Month 1-2
[ ]	Mobility Assistance Gear	Trial walking poles, ergonomic shower chair, and ice compression units before surgery.	High	Month 8-9

Table 4. Sensory buffering and assistive device milestones

5. Emerging Action Items & Additions (Active Tracking)

Handwrite or record emerging items as consultations progress:

Done	Category / Topic	Action Description & Follow-Up Notes	Priority	Due Date
[ ]				
[ ]
