RUMBLE OS • CLINICAL HYDROTHERAPY (A4 LANDSCAPE EDITION)

Sheet 1: Foundational Decompression & Multi-Planar Gait Retraining • Poolside Laminated Card

h1 Buoyancy Spinal Decompression

25 MIN • RESTORATIVE DECOMPRESSION

1. Buoyant Vertical Traction — 6m 15s
Noodle under axillae in deep water. Zero foot contact; allow legs and pelvis to hang weightlessly. Deep diaphragmatic breathing.

2. Gentle Knee-to-Chest — 6m 15s
Suspended by noodle, draw knees toward chest (hold 3s). Opens posterior facet joints and unloads lumbar discs. **3x10 reps.**

3. Aquatic Torso Pendulum — 6m 15s
Legs sway smoothly side to side in water column. Cervical spine stays completely still and eyes forward.

4. Supine Float & Reset — 6m 15s
Supine float with neck collar and knee bolster. Slow 4s inhale, 6s exhale to reset central autonomic tone.

h2 Aquatic Multi-Planar Gait & Walking

20 MIN • ADAPTIVE MOBILITY & GAIT RETRAINING

1. Forward Water Marching — 5m 00s
Chest-deep water. Drive knees up to 70° with deliberate heel-to-toe push-off. Natural reciprocal arm swing submerged.

2. Backward Walking — 5m 00s
Step backward toe-to-heel. Feel water resistance activate hamstrings and glutes without lumbar hyperextension.

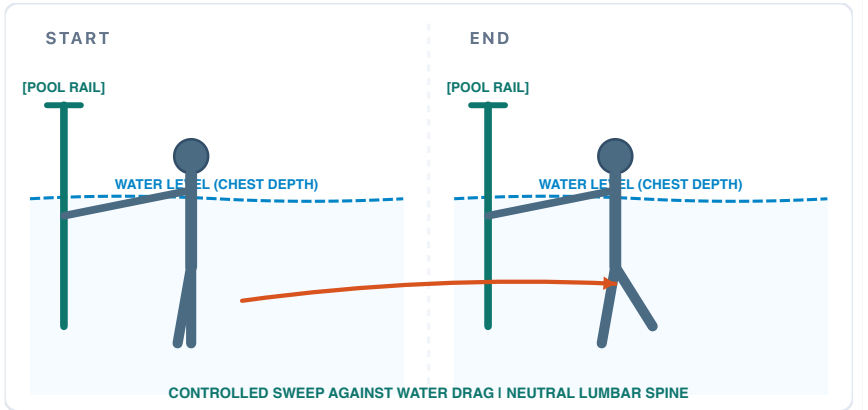

3. Lateral Sidestepping — 5m 00s
Face pool edge. Step sideways across lane against water drag. Fires gluteus medius to stabilize pelvis & SI joint.

4. Calming Wall Rest — 5m 00s
Stand supported with back against pool wall. Hydrostatic pressure supports venous return and lymphatic drainage.

BIOMECHANICAL RULES: Cervical neutral strictly locked (C4–C7 fusion); right shoulder below 80° plane; left knee max 45° flexion. If sharp radicular nerve pain occurs, exit pool immediately.

Buoyancy Spinal Decompression (h1)
Weightless Noodle Traction • Head Grounded & Supported • Lumbar Offload

Aquatic Forward Marching & Multi-Planar Gait (h2)
Chest-Deep High Knees • Submerged Reciprocal Arm Swing • Upright Torso

h3 Aquatic Hip & Core Stabilization

20 MIN • TARGETED STRENGTHENING

1. Standing Hip Abduction — 5m 00s
Hold pool rail; sweep leg out laterally against water drag. 3x12/leg. Controlled tempo without pelvic tilt.

2. Kickboard Core Press — 5m 00s
Hold kickboard at chest. Engage deep core and push down into water column. 3x10 (3s hold at bottom).

3. Aquatic Cycling Motion — 5m 00s
Rest back on noodle. Rhythmic smooth bicycle pedaling against fluid drag without knee shear.

4. Floating Spine Rest — 5m 00s
Supported supine float with noodle under knees. Lengthen spine, relax deep hip rotators.

h4 Warm Water Relaxation & Lymphatic Flush

20 MIN • LYMPHATIC & AUTONOMIC FLUSH

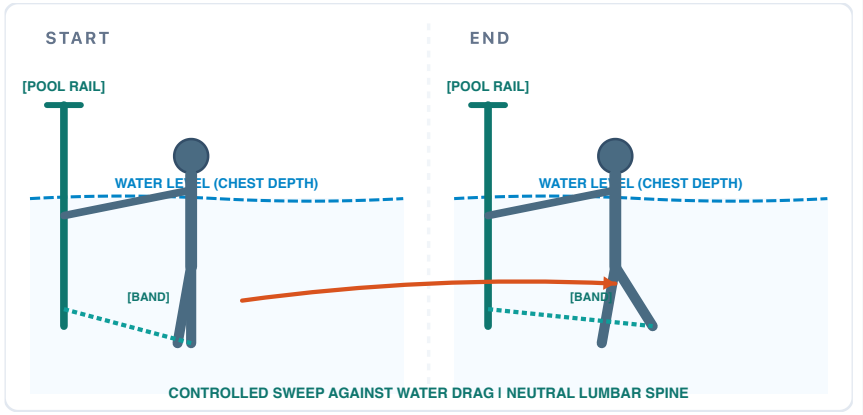

1. Hydrostatic Breathing — 5m 00s
Submerged to clavicles. Inhale 4s; water pressure assists full 6s exhalation. Resets vascular tone.

2. Aquatic Arm Sweeps — 5m 00s
Figure-eight arm sweeps submerged below chest line. Drives axillary lymphatic drainage without shoulder impingement.

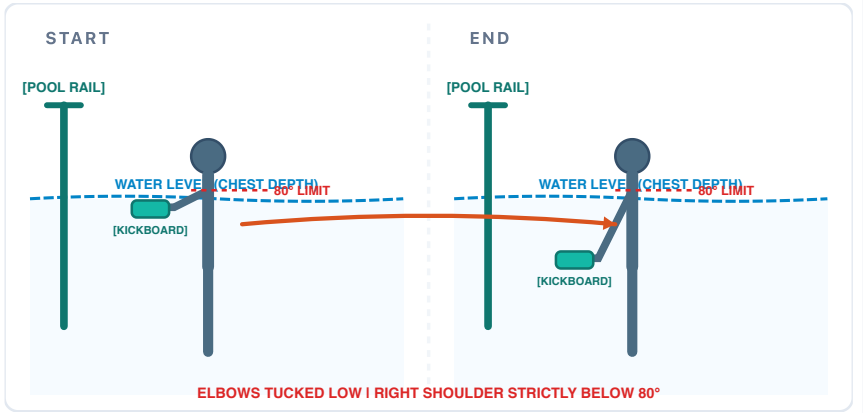

3. Ankle & Foot Mobility — 5m 00s
Point, flex, and rotate ankles at pool step. Activates calf muscle pump to clear peripheral swelling.

4. Supported Float Reset — 5m 00s
Stillness on water surface with neck pillow and knee noodle. Deep parasympathetic pain downregulation.

EXPRESS RESETS: A1 Water Reset (6m) • A2 Side-Step (6m) • A3 Balanced Aqua (14m) • A4 Low-Impact (14m) • A5 Full Aqua (25m) • A6 Variety (25m).

Standing Hip Abduction & Extension (h3)
Rail-Anchored Sweep • Upright Spine • Gluteus Medius Isolation

Kickboard Core Press-Down (h3)
Downward Fluid Resistance • Transversus Bracing • No Cervical Strain

H-MED1 Dynamic Aqua Balance & Banded Core

30 MIN • MEDIUM RESISTANCE

1. Dynamic Warm-Up — 5m
Forward/backward strides in chest-deep water • Lateral side-stepping holding pool rail.

2. Banded Hip Abduction — 8m
Band to rail & ankle. Sweep out laterally (3x12/leg) + extend straight back into glutes (3x12/leg).

3. Wall Core Press — 7m
Flatten lumbar spine into pool wall (10s x 6 reps). Press submerged noodle downward (3x10).

4. Suspended Core — 6m
Noodle under axillae in deep water. Alternate slow knee lifts against water drag (3x15 reps).

H-MED2 Total Body Aquatic Conditioning & Rowing

45 MIN • MEDIUM RESISTANCE

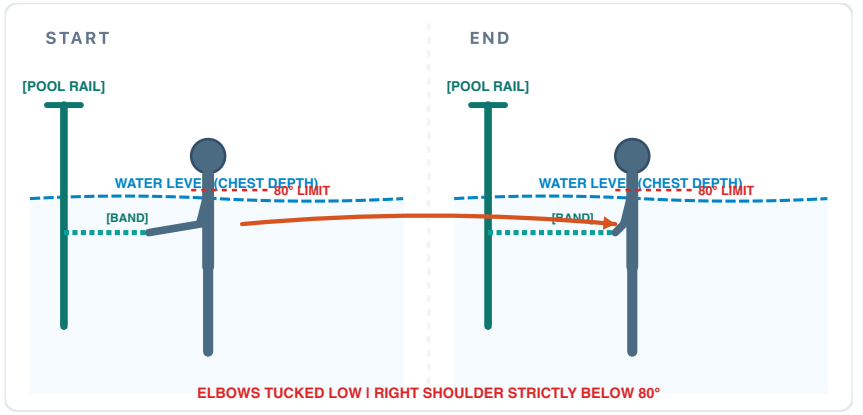

1. Scapular Gait Prep — 10m
Multi-directional strides & submerged arm sweeps with chin retractions (chest-deep).

2. Rail Band Low Rows — 10m
Anchor heavy band to rail. Low Row squeezing scapulae (3x12). W-Row for lower traps (3x10).

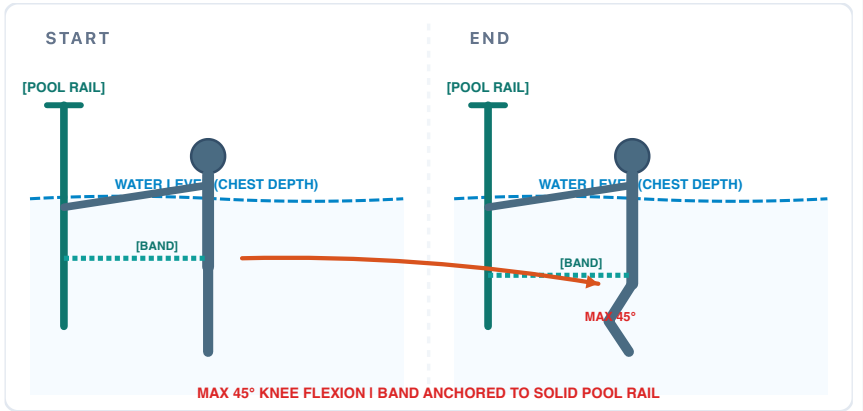

3. Banded Shallow Squats — 10m
Heavy band around pelvis/rail. Sink into shallow 45° squat; drive through heels/glutes (4x10).

4. Kickboard Presses — 10m
Submerge kickboard vertically (3x12). Gentle torso rotations with board submerged (3x10).

THERABAND SAFETY: Anchor securely to stainless rail with slip-knot. 2s pull / 3s return against water drag. Keep elbows low; right shoulder below 80°.

Submerged Band Low Rows & W-Rows (H-MED2)
Waist-Height Rail Anchor • Elbows Tucked Low • 80° Shoulder Limit Enforced

Rail-Supported Banded Shallow Squats (H-MED2)
Heavy Pelvic Band Pull • Max 45° Knee Bend • Forceful Glute Drive

RUMBLE OS • CLINICAL HYDROTHERAPY (A4 LANDSCAPE EDITION)

Sheet 4: Advanced Heavy Resistance & Kinetic Chain Overhaul • Poolside Laminated Card

H-EXP1 Heavy Hydro Resistance & Power Protocol

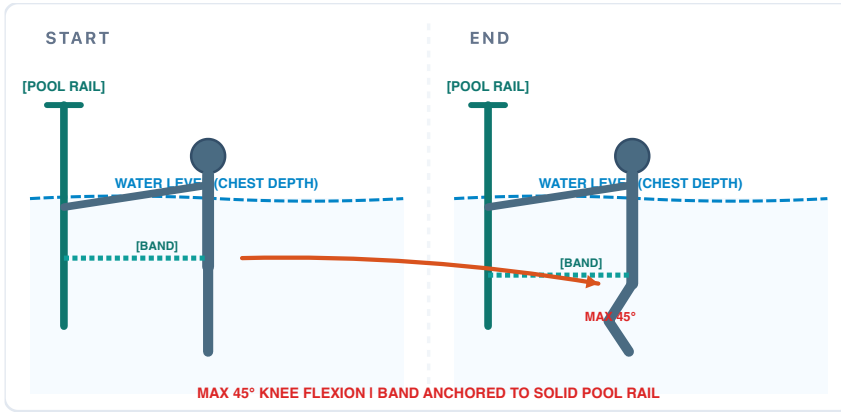

60 MIN • EXPERT / HIGH RESISTANCE

1. Power Squat Pulses — 10m
Heavy band at pelvis. Explosive 45° pulses driving through glutes. 4 sets x 12 reps (60s rest).

2. Submerged Band Rows — 10m
Left arm: heavy explosive rows (4x12). Right arm: controlled micro-range pulls below 80° (4x8).

3. Banded Knee Ext & Kicks — 12m
Ankle band: extend knee against band (4x12/leg). Side abductions against band (4x12/leg).

4. Deep Water Crucible — 10m
Flotation belt: alternate 45s fast bicycle pedaling with 45s double knee-to-chest tucks (5 cycles).

Power Squat Pulses (H-EXP1)
Heavy Rail Band Pull • 45° Explosive Glute Extension • Upright Spinal Neutrality

H-EXP2 Multi-Planar Hydro Endurance Overhaul

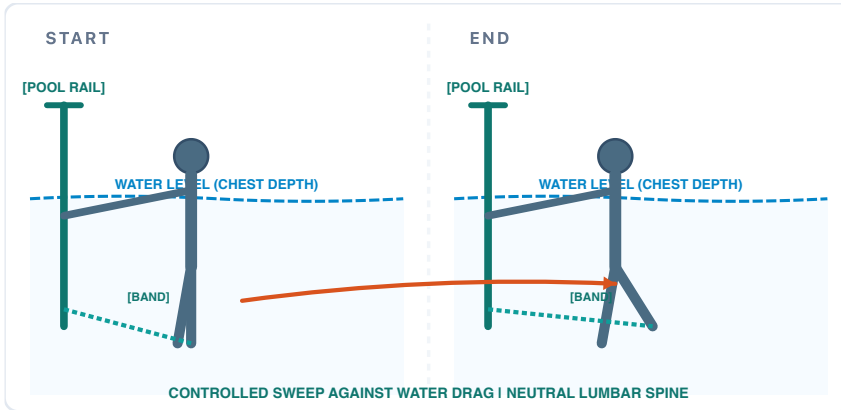

75 MIN • EXPERT / HIGH ENDURANCE

1. Stride Circuit — 12m
400m water stride combination (forward, backward, carioca crossover steps).

2. Banded Monster Walks — 15m
Heavy loop band around ankles. Lateral walk across pool (4x15) & monster zig-zag walks (4x12).

3. Glute Kickbacks — 12m
Heavy band on rail & ankle. Drive straight back into terminal glute extension (4x12/leg, 2s hold).

4. Interval Treading — 13m
Belt on, deep water: 1 min max effort treading / high-knee churn + 1 min slow recovery (6 rounds).

Banded Monster Walks & Stride Overhaul (H-EXP2)
Heavy Ankle Loop • Wide Multi-Planar Strides • Gluteus Medius & Pelvic Bracing

CORE GOVERNANCE: All power generated from glutes, hips, and deep core. Zero spinal arching. Hydrate before and after pool.

H-EXP3 Master Hydro Athlete Rehabilitation Protocol

90 MIN • EXPERT MAXIMUM

Phase 1: Thermal Prep — 15m
Multi-speed walking, shoulder sculling, scapular retractions, ankle dorsiflexion.

Phase 2: Upper Chain — 20m
Rail Low Rows (3x12), W-Rows (3x10), band rotator cuff complexes (3x10/arm, right arm low).

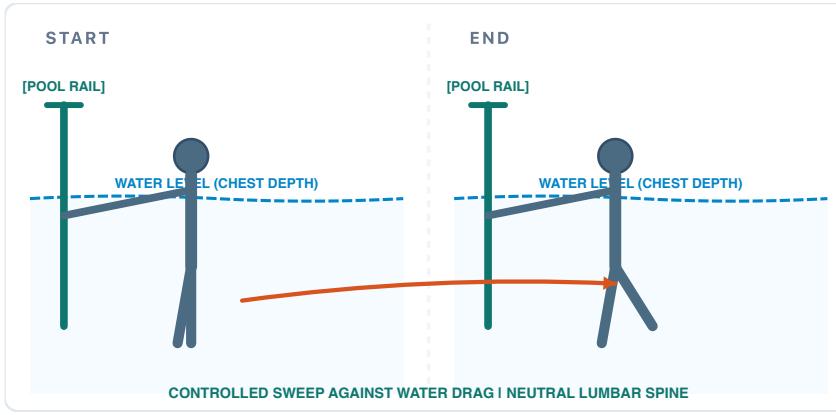

Phase 3: Lower Power — 20m
Heavy banded squats with 3s pause at 45° (4x10), knee extensions (4x12/leg), glute kickbacks.

Phase 4: Core Crucible — 18m
Deep water scissor kicks (4x45s), kickboard presses (4x12), high-knee sprints (5x 1m on / 1m off).

Phase 5: Gait Balance — 10m
Single-leg balance holds (2m/leg) & heel-to-toe tightrope water walking with arm sweeps (6m).

Phase 6: Surrender — 7m
Noodle-supported vertical spinal traction & supine float with diaphragmatic parasympathetic breathwork.

EMERGENCY STOP & CLINICAL DISCLAIMER: Stop immediately if electric shooting pain, dizziness, or chest tightness occur. Preserved for clinical decision support. Cleared by treating surgeons & physiotherapists.

Phase 2: Heavy Band Upper Body Chain
Heavy Rail Rows • Scapular W-Rows • Right Shoulder Protected (<80°)

Phase 3 Lower Power

Phase 3: Lower Kinetic & Pelvic Power
Banded 45° Rail Squats • Submerged Knee Extensions • Glute Drives
